Dear Tom:

On behalf of the Members and Board of Directors of Minnewasta Golf & Country Club, we would like to extend our sincere thanks for your efforts on our recent irrigation project, especially after suffering through 20 some years with a real substandard system, as made apparent by the results that we are getting despite the recent dry spell.

During the time you spent with us, we greatly appreciated your extensive and thorough knowledge of every aspect of irrigation systems, with ours being a decoder system. In addition to that your ability to keep the subcontractors on line and more importantly on budget was one of the most significant benefits to our organization. Your willingness to demand accountability has really made our irrigation project a success.

Last but not least, your initial ground work from obtaining the layout and having the entire course mapped with the GPS system, and laying out what amounted to a complex system of control valves, booster pumps and various lines throughout the many geographical challenges that Minnewasta presented (creeks, hills, valleys, pipeline crossing, and not to forget the vast amount of stone on the west side of the escarpment) really made it apparent to us that this type of project is realistically beyond most organizations ability to "do it yourself".

And happily we are seeing the results!

Everyone is commenting on the changes they are seeing. Thick green rough; entire coverage on the greens and green surrounds; our tee boxes have never maintained as well as they have now; and despite some significant damage from the pipeline they have almost returned and they are better than they have ever been.

So again, thanks for your dedication to our project, we wish to the absolute best in your future projects, and given the success that we have shared other organizations would be well served with your services.

Respectfully

Brian Foster
President
